Our Kenting, Our Trip

Kenting National Forest Recreation Area

With its well-developed high-elevation coral reef forests and tropical monsoon rainforests, this area is home to magnificent giant Chinese banyan trees gripping tightly onto the reef rocks, robust silver-leaved trees with sprawling buttress roots, and majestic white banyans forming forests on their own. Groups of Formosan macaques and red-bellied squirrels roam freely throughout the land. If you look closely, you may even spot Formosan sika deer and crab-eating mongooses hiding behind the trees. Don't forget to look up at the treetops for rare migratory birds and listen to their beautiful songs. Within the park, limestone formations and caves such as the Silver Dragon Cave and Stalactite Treasure Grotto await your exploration. Embark on a journey through this enchanted forest and enjoy the serenity that comes from a peaceful woodland stroll.
